

ExciPad LV V2

Control all loader functions of the wheel loader **easier than ever!**

ExciPad LV V2 is our latest generation lever system that simplifies and improves the control of all loader functions. Five of the total seven function keys are programmable.

ExciPad LV V2 is highly ergonomic and has despite the compact design, room for four linear joysticks.

ExciPad LV V2 is the perfect solution for wheel loaders and it can be provided with or without CAN-Interface, to meet your requirements regarding function and application.

ExciPad LV V2 with armrest

Each function can be provided with individually designed symbols, including soft and elegant back-light feature.

We can provide the ExciPad LV V2 with your specific requirements and application. ExciPad LV V2 can also be provided with an armrest.

GUARANTEED QUALITY WITH EXCIDOR

Excidor develops, produces and sells control systems and products for operator environments in utility vehicles. Safety, simplicity and flexibility are the hallmarks of all control systems and products developed and sold by Excidor. Excidor supplies to many of global machine manufacturers.
