

TRC Concept

Complete systems / Tilt rotator / 14/03/2016

Tilt and rotator control

ExciControl TRC replaces all of the brand-specific systems for tilt and rotator control. With a single system, it has never been easier or more profitable to offer freedom of choice.

SIMPLE

One system instead of many – so much easier. With our custom cable harness and machine-specific instructions, installation is safer, easier and above all faster. No more loose cables.

- ✓ One set of installation instructions
- ✓ One wiring diagram
- ✓ One risk analysis
- ✓ One service tool
- ✓ One supplier

VERSATILE

TRC does not compromise on quality or capacity. With a large selection of handles and support for a variety of different tools and adaptations, it is easy to meet demands.

- ✓ Superior precision
- ✓ Ready for add-on equipment
- ✓ Large selection of handles
- ✓ Custom branding in the display

SMART

It is smart, safe and more profitable to use one single control system, regardless of the brand of tilt rotator. Particularly when it comes to training, service and maintenance.

- ✓ Less time at the workshop
- ✓ Reduced need to stock spare parts
- ✓ Training in one single system
- ✓ Support from a single supplier
- ✓ Bucket lock function that satisfies ISO13031
